3.5
Touch screen Full controlat your fingertips

≥40h
Runtime TM80Vet can work more than 40h with rechargeable Li-battery. It can reduce running cost of hospital

IPX7
Fluid ingressprotectionTM80 Vet can also betemporarilyimmersed in water, including patient showering

230g
Light weight Thelighterweight with integratedmulti-parametersprovides better patient experience

1.5m
Droptested TM80 Vet withstands accidental drops from 1.5 meters

ECG

- Multi-lead sync calculation
- 3/5-lead ECG
- 25 arrhythmia types
- ST/ST Template
- Real time QT/QTc

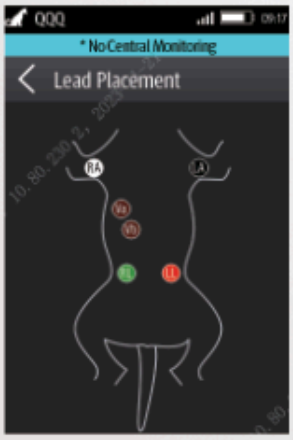
RESP

- Impedance algorithm
- CMS real-time breathing asphyxiation alarm

Streamline Your Workflow

TM80 Vet not only connects with BeneVision CMS Vet for centralized monitoring and management, its unique 3.5” rotatable color screen can also allow operators to check monitoring information at bedside, which makes it more convenient and timely understanding of patient conditions.

Medical staff can flexibly turn on or turn off the telemetry box screen according to clinical needs. For example, When doctors check up wards, they can turn on the screen to browse information on the palm easily; when the screen turns off, the complete monitoring and alarm information can only be shown at the central station, avoiding disturbing patients by the sound and light of the telemetry box.



Graphical alarm indication

Drag to customize display order of waveforms

Support both landscape and portrait displays

BeneVision TM80 Vet

Dedicated State

- Flexible telemetry range to effectively avoid signal interference caused by Bluetooth, Wifi, 2G/3G/4G, etc.
- Leading dual-way antenna array spatial diversity design eliminates signal attenuation causedby the movement of patients in the hospital, realizing optimal transmission of monitoring information under that frequency adjustment and power setting, customized stable and reliable wireless coverage scheme for customers.
